I am a hard-working junior web developer. Graduated Programming Primary Course on Code Academy School and now deeply involved in the programming area independently.

For a long time I wanted to work as a developer and when I finished my course, I realized it was my real vocation. I am striving for rapid development in the field of programming because I see the potential of this area.

CAREER HISTORY

November 2, 2018 – February 5, 2019.

Warehouse operative in cosmetics and perfumery company UAB „Kosmelita“, Lithuania. I was responsible for stock control, loading/unloading goods, physical inventory checks, tidying warehouse, helping team members to complete the daily tasks.

March 5, 2018 – October 26, 2018.

Internship as a junior web developer and a game tester at „ITMA LT“ company. I was responsible for websites maintenance (such as to code a language change option on www.miltecha.lt), fixing, assisting to create new sites (consulting about timber and it's graphics during the development of <https://www.mobililentpjuve.lt> website), game testing (Lineage II: Revolution) for bugs and preparing the game for the opening.

February 23, 2015 – October 16, 2017.

Chief specialist of urban district division of Kaunas District Municipality. With ArcMap I developed and administered GIS database of Kaunas District Territory (which occupies 577.6088mi²) Monitoring, thus optimizing the time spent on the performance of the Urban Development Department. Contributed to www.krs.lt new website development by participating in commissioning, testing, and constant supervision. I also prepared answers to requests from natural and legal persons, complaints, inquiries from municipal council members and approved design proposals for construction projects.

ACADEMIC BACKGROUND

December 12, 2017 – February 12, 2018.

Code Academy, Full stack 320 h. course.

I gained the skills to create fully functional systems using PHP programming language. Knowledge and practical use of hypertext markup (HTML) language.

Cascading style templates, application of the most popular template "Bootstrap". Using JavaScript programming to style a page and give it extra functionality.

September 1, 2010 – June 20, 2014.

Kaunas University of Technology. Bachelor's degree in civil engineering.

September 1, 2006 – July 12, 2010.

Kaunas Vincas Kudirka secondary school.

Won 1-st place in 12th grade school math Olympiad.

September 1, 1998 – June 12, 2006.

Kaunas Petras Vileišis secondary school.

PERSONAL SKILLS

Native language: Lithuanian.

Other languages: English (fluently), Russian (average skills).

Computer skills:

Good computer skills in designing with Autodesk AutoCAD design system, using Microsoft Office™ (Microsoft Excel, Microsoft PowerPoint, Microsoft Word, Microsoft Access) office suite, using the Geographic Information System ArcGIS 10, TeamViewer - software for remote access to computers, using the Windows 7-10 operating system. Good programming skills with HTML5, CSS3 languages, Bootstrap 4 framework.

Basics of using GitHub (repository hosting service), WordPress content management system. Basics of programming with PHP, SCSS, JQuery, Ajax.
